Sustainable Promotions for a Better World

Innovation. Participation. It's up to all of us.
Together, we can work towards a greener future.

Index

007 Recycled or Recyclable Materials

We all know we should be recycling, but that doesn't mean we have to compromise on quality or aesthetics when it comes to the latest promotional gifts! Take a look at our terrific range of notebooks made from recycled paper that can be given and enjoyed...and recycled again!

015 Biodegradable Pens

Thinking green is not just about today. We also have to think ahead to tomorrow. Our range of bio-plastic pens are not only more environmentally friendly to manufacture, they also break down much quicker too. *Make* a choice that will make an impact on your clients, not on the environment!

021 Green Energies

Back to basics: Green energy is the future of our planet. If nature itself can produce energy that's low impact and sustainable, so can we! Our green energy products are a great alternative. Not only green, they're also innovative, attractive and fun!

049 Recycled Bags

Old habits are hard to break, but saying no to plastic shopping bags is a simple way we can make a big difference to our planet's future. Our re-usable bags are the latest trend in green consumerism, and they come in a range of fashionable fabrics, colours, shapes and sizes.

065 Organic Cotton

Organic cotton is produced without the use of toxic chemicals like pesticides and fertilizers which pollute the earth and harm fragile natural Eco-systems. The same product, with no compromise on quality or style that's also good for the environment? Now that's thinking green!

073 Natural products

Nature is our most precious resource, and right now it's a great source of inspiration for the latest products for your home and office. Tune in to your natural instinct as we show you how to bring a little nature into your home.

SUSTAINABILITY:

“Meeting the needs of the present without compromising the ability of future generations to meet their own needs”

Supported by

Our choice is to support Tree Nation

Our choice is to support Tree Nation: a company committed to planting trees to fight erosion, poverty and climate change. Mid Ocean Brands is contributing 1,000 Acacia Senegal trees, to be planted in Niger, Africa, fighting desertification of the land and supporting the local community. Join the effort to plant 8 million trees in Africa, for a greener planet and a brighter future. Visit www.tree-nation.com for more information.

Now Everybody wants to be Green

Maximize the impact of the message, minimize your impact on our environment. This concept is key to the success of combining a great promotional product with respect for our environment. But 'going green' is not just good for the environment, it's good for business too! 'Thinking Green' is a con-

cept that is trendy in today's consumer marketplace. People are increasingly aware and concerned about the fragility of our earth. So why not enhance your message with something tangible? Something green? Show your customers you're committed to a greener planet.

Our world is already full of waste, so now is the time to be smarter with our resources. Re-processing a used material into a new product that's just as attractive, and the same or better quality as the old one, is a simple way to keep using the products we like, and take care of our planet. By supporting recyclable products, we also support the development of advanced recycling technology, which will go a long way in supporting our planet, well on into the future.

Recycled or Recyclable Materials

Biodegradable Pens

Bio-degradation is an ecological waste management alternative. Whilst some products need 50, 450 years or eternity to finally break down, biodegradable materials decompose considerably faster, reducing landfill and therefore our longer-term impact on the environment. The future of our planet depends on bio-degradation, so choose from the wide variety of pens and pencils in this section to make a real difference.

Green Energies

"Green Energies", also called "Clean Energies", are more environmentally friendly methods of generating power, with less damage to our environment. Just look around you: nature itself produces its own energy: running water, the sun, and the wind are all natural power sources. It's a fact: "Green Power" is the future of the planet. So let's choose products that we like, that are useful, that look great, and are manufactured with Green Energy. Let's make the ecological choice.

Recycled Bags

A range of hand made bags to take with you to the shops. Each time we buy something we are routinely handed a bag with the purchase. The Zillions of plastic bags we throw away every year are a waste of money and they contaminate the earth and the ocean as well. So here's our suggestion: When you go shopping, don't accept a plastic bag, carry your own instead. The earth will thank you for it!

Organic Cotton

Why wear Organic Cotton instead of regular cotton? Organic Cotton is greener! The plants are raised without the use of fertilizers or pesticides, whilst a regular cotton crop requires heavy treatment with these chemically toxic products, which pollute the soil and water systems that collect runoff when it rains. Our bags, T-shirts and polo's are not only better for the environment, but beautifully designed. Think ecological, wear ecological.

Natural Products

People go to great lengths to decorate their homes beautifully, to make their living atmosphere unique and pleasant. Every room is important- your living room, bathroom, kitchen...and nature is an incredible source of inspiration, especially for product designers! We did our best to choose the most interesting, natural and enjoyable products to help you bring the Great Outdoors, in!
